GC1958-MDZ 直驱式微油自动剪线针送料平缝机

本机专门设计采用小型内置式、大功率、大扭矩的伺服电机直接驱动，舍弃了传统的传动皮带，没有因皮带磨损带来的污染，启动和停止反应快、定位准、减少噪音和振动。针杆部位微油润滑，针送料方式使送料特性顺畅稳定，缝料层之间不易产生滑移。高低速缝纫，倒顺缝针距误差极小。由于本机搭载高性能数控系统，具有自动剪线，自动定位，自动定针数等数项自动模式，可广泛应用于缝制丝绸、尼龙化纤等类似薄料织物。

GC1958-MDZ is designed with needle bar semi dry and mini built-in powerful servo motor for direct drive, which can start and stop quickly with accurate positioning. The needle feeding assures smooth stitching and can avoid displacement between layers. The stitch length difference between sewing at high speed and at low speed or between forward feeding and backward feeding is very little. The high efficient digital control system features automatic thread trimming, automatic needle positioning, automatic stitch presetting and other automatic modes. It can be widely used in sewing silk, nylon and synthetic light fabrics.
